

McLarney Racing

ADDRESSING THE NEEDS OF RACERS AROUND THE WORLD AND PROVIDING THEM WITH BEST EQUIPMENT TO SECURE A SUCCESSFUL FUTURE.

The McLarney Daytona Bike and Team started a great many years ago when the Nuova Faor SF501 seemed to be the only bike to use. Derek and Ian McLarney were championing the Thunder Tiger

Type-A

equivalent and eventually replaced that many parts with their own. the Daytona Type-A was born. The Type-A is a conversion kit which has many new parts like the revolutionary CSC carbon chassis rails which run the length of the bike and the new low down location for

the servo's and motor. But this kit required a donor bike to complete it, now Ian and the rest of the team are working towards a full (RTR) Race bike that will be competitive on the track and still easy too learn with and adapt too.

McLarney Racing is expert in the many areas of the sport:

- Chassis Design
- Fork Assembly
- Suspension
- Drive-Chain
- Body Work
- Support

“McLarney Racing...Because Winning is Our Business...”

For more details on McLarney parts or advice on setup please visit our website or contact us by email, details are on the bottom of the page.

Alternatively at one of our resellers:

- Formby Models www.formbymodelshop.com
- RC Bike Shop www.rcbikeshop.com
